PREFACE.

Under direction of the Board of Trustees, the fourteenth annual report of the Missouri Botanical Garden is presented to the public. In addition to the administrative reports of the officers of the Board and the Director, this volume contains an important revision of the genus *Lonicera*, by Mr. Alfred Rehder, of the Arnold Arboretum, and a catalogue, by Mr. C. E. Hutchings, of the additions which have been made to the Sturtevant Prelinnean Library, of the Garden, since the publication of the catalogue of the original collection, in the seventh report.

The thirteenth report was issued on July 28th, 1902, which fixes the date of publication of the paper on Yuccaeae, forming the larger part of the volume, separates of which were distributed on the 30th of the same month.

These reports are sent to scientific institutions and journals in exchange for publications or specimens desirable for the Garden, and, when possible, reprints of the botanical articles they contain are presented to botanists occupied with a study of the subjects they refer to. Any of the Garden publications not out of print may be purchased at approximately the cost of publication from A. I. Eriksson, Tufts College, Mass.; R. Friedländer & Sohn, Berlin, Germany; W. Wesley & Son, London, England; or the undersigned.

WILLIAM TRELEASE.

ST. LOUIS, MO., July 28, 1903.
